## Focus On: TRA - Gig Harbor

TRA will become the latest in a growing number of medical service providers in Gig Harbor when it opens a new diagnostic imaging center in May.

The center will occupy 3,000-square-feet in the space that formerly housed Olympic Pharmacy Health Care Services in the 4700 Pt. Fosdick building. The facility will offer CT, as well as Gig Harbor's first onsite MRI facility.

CT scans (also known as CAT scans) are frequently used to evaluate symptoms that result from blood vessel blockages, infection, tumors, and traumatic injuries. MRI scans differ in that they are used to evaluate many of the same symptoms, but can define the differences between healthy, diseased, or injured tissue.

Dr. Elam, the current medical director of TRA-Tacoma, will become the site's new medical director.

One reason for TRA's decision to open the new Gig Harbor facility is that the population there is expected to double in the next 16 years.

"There are currently about 120 healthcare providers in the Gig Harbor and Key Peninsula area," says Dr. Elam. "For some time now our referring physicians locally have been asking us to consider opening a local facility for the additional convenience for their patients."
